SUMMARY

Third-year Computer Science Engineering student (CGPA 9.44/10) with hands-on leadership experience as Team Lead on a corporate web-application redesign at Linde Engineering, an accepted research paper on AI-based cloud intrusion detection (ICICCS 2026), and a portfolio of production-style AI/full-stack projects spanning RAG systems, computer vision, and automation.

SKILLS

TECHNICAL SKILLS

Languages: Java, Python, C, C++, JavaScript, TypeScript
Frontend: React.js, Next.js, Framer Motion, Three.js
Backend: Node.js, FastAPI, .NET
Databases: MySQL, MongoDB, Supabase (PostgreSQL, pgvector)
AI/ML & APIs: Gemini API, Groq, Claude API, OpenCV, YOLOv8
Cloud & Tools: Azure AD, Git, GitHub, REST APIs, Cloud Computing (IaaS/SaaS)

EXPERIENCE

Team Lead — Summer Internship | Linde Engineering India Private Limited *Jun 2026 – Jul 2026*

- Led a team to redesign and modernize Linde's internal corporate helpdesk portal, owning the redevelopment from planning through deployment
- Audited the existing codebase and identified 20 functional and deployment issues (hardcoded localhost URLs, broken attachment uploads, an analytics join bug, race conditions on file writes), resolving all 20 across 3 prioritized sprints ahead of deployment
- Redesigned the frontend UX with custom animations, optimized backend architecture, and implemented role-based access control with admin and analytics dashboards

Stack: React, .NET, SQL Server, Azure AD, Framer Motion, Three.js, Chart.js

Quality Assurance | Aaruush SRM (Techno-Management Fest) *Aug 2025 – Present*

- Support QA processes for a large-scale techno-management fest, testing event workflows and platform features ahead of launch

PROJECTS

Threshold — SRMIST Student Companion App | Personal Project *2026 – Present*

- Built a companion app consolidating SRMIST students' attendance, marks, CGPA, and timetable into one interface, with a Next.js (Vercel) frontend and Python/FastAPI (Render) backend packaged via Capacitor
- Working around anti-bot fingerprinting on the portal login; extending support to iOS via a companion web app

Stack: Next.js, Python, FastAPI, Capacitor, Render, Vercel

Lecturn | Personal Project *2026 – Present*

- Building a mobile-first web app that converts photographed lecture slides into organized, searchable notes, structured across an 18-phase build roadmap
- Implementing semantic search over notes using pgvector embeddings and Gemini 2.5 Flash for slide-to-text processing

Stack: Next.js, FastAPI, Supabase (Postgres, pgvector, Storage), Gemini 2.5 Flash, Groq, Framer Motion

SmartStudy AI | Personal Project

- Built an AI-driven adaptive learning platform using semantic embeddings for knowledge-gap detection and personalized study-path generation with real-time comprehension quizzes
- Migrated auth to a custom phone-OTP flow (Supabase Edge Functions + WhatsApp Cloud API) and replaced OpenAI/Pinecone with Gemini embeddings + pgvector, using Groq Whisper for transcription

Stack: Next.js 14, Supabase, pgvector, Groq, Gemini API

Global Deal Finder | Personal Project

- Designed a cross-border, true-cost price comparison platform on a fully free-tier stack, with a distinctive UI system using custom typography and Framer Motion animations

Stack: Next.js, FastAPI, Supabase, Groq

FRIDAY — Voice-Activated Desktop Assistant | Personal Project

- Audited a 218-file codebase, identifying ~40% incomplete stub modules, then implemented computer-vision modules (screen reading, camera vision, real-time translation) using OpenCV, YOLOv8, and face_recognition

Stack: Python, OpenCV, YOLOv8, face_recognition, deep_translator

PipeStressRM | Linde Engineering — Tooling

- Automated resource/task allocation and 2-year Gantt scheduling for pipe stress engineering projects using OpenPyXL, replacing manual planning

PUBLICATIONS

"AI-Based Cloud Intrusion Detection Using Random Forest" — Accepted, ICICCS 2026

- Achieved 98.2% accuracy on the CICIDS2017 dataset for real-time cloud intrusion classification using a Random Forest model

CERTIFICATIONS

Oracle APEX Cloud Developer Certified Professional (Oracle, 2025) • Database Management System (NPTEL, 2026) • DSA using Java (NPTEL, 2025) • OOP Fundamentals (NPTEL, 2024) • Intro to Machine Learning (NPTEL, In Progress)

EDUCATION

B.Tech in Computer Science Engineering | SRM Institute of Science and Technology *2024 – 2028*

CGPA: 9.44 / 10.0 (through Semester 4) • Class XII (CBSE), 2024 — 71.8% • Class X (CBSE), 2022 — 87.4%
